

# Spirent TestCenter 400G Ethernet Solution

TOYO Corporation

Spirent is continually developing new solutions for testing 400G capabilities throughout the network.

## pX3 400G Seven-Speed Appliance

- ✓ Industry's highest density QSFP-DD test appliance
- ✓ PAM4 and NRZ solution in one platform
- ✓ Provides large capacity testing for a variety of services
- ✓ 4 to 8 port upgrade available via licensing

## pX3 2-Port Seven-Speed Test Module

- ✓ Industry's highest density single slot test modules
- ✓ Industry's first native QSFP test module
- ✓ PAM4 and NRZ (QSFP-DD) solution in one platform
- ✓ Provides large capacity testing for a variety of services

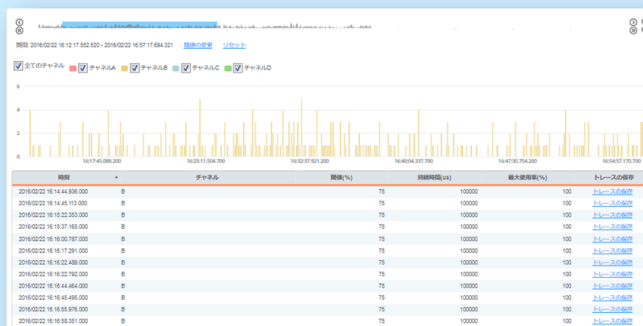

# SYNESIS Network Capture Appliance

TOYO Corporation

SYNESIS is a network capture appliance that can continuously capture at full line rate.

- ✓ Full line rate capture with no packet loss, with patented stream to disk technology
- ✓ Support 100G QSFP28 x 4 ports and 40G / 25G / 10G / 1G
- ✓ Detect microburst traffic in 100  $\mu$ sec
- ✓ Time stamp resolution 1ns

Show the overall microburst quantity;  
Min resolution:100  $\mu$ sec

Show Problem statistics information;  
"Show Trace" to drilldown.
