

# Spirent's New Test Work Flow for Virtual Networks

Spirent offers a total solution for testing virtual network systems and elements.

## Key Benefits

- › Improve visibility of test topologies and test results
- › Maximize test quality and throughput
- › Optimize NFV system and component function and performance

# Fluke Networks - Network Time Machine

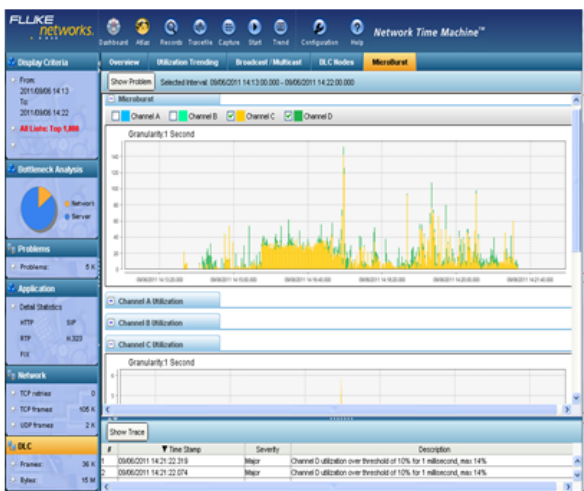

## Large Traffic Capturing Tool

...Writing "directly" the traffic data onto the large HDD

### High Lights

- › Very long-term traffic capturing at 10Gbps
- › Without dropping any packets
- › 2 ports configuration
- › Intuitive and graphical ClearSight Analyzer for traffic analysis
- › Detect the microburst every 1 millisecond

- Show the overall microburst quantity;
- Every channel can be checked/unchecked by user, and is marked in unique color;
- Min granularity: 1 millisecond.
- Show the individual channel utilization percentage;
- Min granularity: 1 millisecond.
- Show Problem statistics information;
- "Show Trace" to drill down.
