The International Conference on  
IP + Optical Network(iPOP2020)  
Exhibition and Conference

**iPOP2020, will now be held virtually on 10-11 September 2020.**

The conference is intended to share among the industry and the academia communities, the knowledge, new findings, and experience on the state-of-the-art of “IP and Optical Networking technologies.” Within the theme, we intend to demonstrate IP & MPLS/GMPLS networks and SDN equipment (IP routers, ODU XCs, Optical XCs, Ethernet switches, MPLS-TP nodes), protocol test equipment/tools, network operation support tools, and other related issues. In addition, we intend to showcase SDN (Software Defined Networks) and NFV (Network Functions Virtualization). The iPOP2020 anticipates a draw of over 300 attendees, made up of network operators, service providers, and equipment vendors.

Join us and other industry leaders in the IP+Optical network technologies. For booth reservation and all other requests, please contact iPOP2020 Exhibition Secretary ([ipop2020-exhibition@pilab.jp](mailto:ipop2020-exhibition@pilab.jp)) by **July 15, 2020**. Exhibitors will be obliged to provide electronic data of poster panel and promotional videos by the beginning of September 2020, which will be uploaded on the website of iPOP2020. **And, we plan to provide interactive sessions for exhibitors. Note that the time slot is limited and will be committed on a first-come first-serve basis.**

**Showcase plan**

We intend to showcase Network Service and Slice Management empowered by Remote Orchestration and Machine Learning, and Leading-edge Network Slice, Data Center Networks, and Disaggregation. This year's showcase challenges to remotely demonstrate its experiments from geographically distant sites. We cordially invite showcase participants demonstrating the technologies including (but not limited to): (1) Remote orchestration for large scale network configuration, (2) Machine learning for networking, (3) Lifecycle management in cloud and edge computing, (4) Disaggregated packet and optical network systems, (5) Transport network slicing.
